CITY SELLS DEBENTURES AT VERY GOOD PRICE

Almost Economy Recommended by Finance Committee.
Solicitor Instructed to Collect All Arrears of Service and other Taxes. Arrangements for Governor General's Reception Satisfactory. Hospital given Grant of \$500.

The regular meeting of the city council was held on Tuesday evening with all members in attendance. The following items were discussed: A meeting of the finance committee was held on Monday evening. The committee recommended that the city should issue debentures for the purpose of raising money to pay the arrears of service and other taxes. The council agreed to the recommendation.

The council also discussed the arrangements for the reception of the Governor General and his family. It was decided that the city should provide a suitable place for the reception. The council also discussed the hospital grant of \$500.

The council also discussed the matter of the city's debt. It was decided that the city should not incur any more debt at present. The council also discussed the matter of the city's finances. It was decided that the city should try to reduce its expenses.

The council also discussed the matter of the city's schools. It was decided that the city should provide for the education of all children. The council also discussed the matter of the city's parks. It was decided that the city should provide for the recreation of all citizens.

The council also discussed the matter of the city's streets. It was decided that the city should provide for the maintenance of all streets. The council also discussed the matter of the city's public works. It was decided that the city should provide for the improvement of all public works.

The council also discussed the matter of the city's health. It was decided that the city should provide for the health of all citizens. The council also discussed the matter of the city's fire department. It was decided that the city should provide for the fire protection of all citizens.

The council also discussed the matter of the city's police department. It was decided that the city should provide for the police protection of all citizens. The council also discussed the matter of the city's courts. It was decided that the city should provide for the administration of justice.

The council also discussed the matter of the city's libraries. It was decided that the city should provide for the maintenance of all libraries. The council also discussed the matter of the city's museums. It was decided that the city should provide for the maintenance of all museums.

The council also discussed the matter of the city's theatres. It was decided that the city should provide for the maintenance of all theatres. The council also discussed the matter of the city's sports grounds. It was decided that the city should provide for the maintenance of all sports grounds.

The council also discussed the matter of the city's public buildings. It was decided that the city should provide for the maintenance of all public buildings. The council also discussed the matter of the city's public works. It was decided that the city should provide for the improvement of all public works.

The council also discussed the matter of the city's public works. It was decided that the city should provide for the improvement of all public works. The council also discussed the matter of the city's public works. It was decided that the city should provide for the improvement of all public works.

PUBLIC SCHOOL BOARD CONSIDERING NEW TEACHERS

A meeting of the public school board was held on Thursday evening when the principal business was the consideration of applications for the positions on the Wetsaskin staff. There were several applications for the position on the high school staff, but no definite selection was made. There were also a number of applications for the vacancy caused by the resignation of Miss Hill of the King Edward school and Miss Thomas of the Alexandra school, but none were selected. Miss Carlson was appointed vice-principal of the King Edward school.

CHURCH CHIMES

IMMANUEL CHURCH

Owing to the absence of Rev. James no services will be held on Sunday next, July 23rd.

GOOD DEMAND FOR WETASKIWIN HOGS

Johnsen Bros. made another large shipment of hogs to the Montreal market recently. Last week they shipped four cars and the week before they shipped three cars to the same market. There is a good demand for the quality of pork raised in the Wetsaskin district.

GOOD QUALITY OF GRAIN IN THE FERINTOSH DIST.

A good sample of wheat was left at The Times office on Monday by Wm. Graff of the Ferintosh district. Mr. Graff lives on section 15-44-22, and says the crops are very good at least in some parts of his community. The sample left with us measured forty-five bushels in length, and was headed out nicely.

LEGISLATURE MEETS JULY 24TH TO RATIFY WHEAT BOARD PLAN

Alberta's legislature will meet Monday afternoon, July 24th, in a special session to consider the proposed bill authorizing the establishment of a wheat board with this province and Saskatchewan.

This announcement was made Monday afternoon shortly before two o'clock by Premier Greenfield, following a meeting of the executive council, an official statement issued at the same time giving reasons for the calling of the emergency session.

It was expected that the session would not be held for a few days later than the date now decided on, but the fact that the Saskatchewan wheat act was passed Thursday to deal with the proposed bill, and the approaching harvest, makes it necessary to take prompt action, were the casting factors in causing the government to summon the session for Monday next.

Dr. Scott, legislative counsel for Alberta, is now in Regina co-operating with the Saskatchewan wheat act in drafting a bill which will be introduced in both houses in conformity with the Dominion regulations. In the event of the Saskatchewan assembly adjourning until the first of next week the bill is formally introduced.

Both houses will start on the actual work of consideration at practically the same time.

Hon. George Headley, minister of agriculture was back from his eastern trip Monday and took a prominent part in the council conference, the ministers attending being Hon. Perren Bader, Hon. V. W. Smith and Mrs. Parley. As announced Monday the decision to have a special session for the adoption of the wheat board plan was arranged at a caucus of the U.P.A. members of the government in Edmonton Saturday. The only thing left, therefore, for the premier to do Monday was to frame a statement on the matter and announce the date of the session.

The Prince of Wales enjoyed many a laugh when he saw some of the Japanese trade dress display outside the shops. Here are a few which may have caught his eye: "Baggage of Resident Vice Consul," "Tugboat of the Japanese Navy," "Horse-Drive Shop," "Costs made from any Hides, Yours or Ours," "Ladies Furnished in the Upper Story."

OBITUARY ROSS I. DAHMS

The sympathy of the community is extended to Mr. and Mrs. Herman Dahms in the loss of their little son, Ross Irving, who was taken from them by the angel of death on Monday evening, at the age of one year and four months. He had been a sufferer for some time. The remains were interred in the Wetsaskin cemetery on Tuesday afternoon, when a large number of the relatives and friends assembled to express their sympathy.

WILLIAM T. RINTOUL

Word was received in the city this week that William T. Rintoul, who was one of the pioneer settlers of the Lewisville district, but who left a few years ago for the Okanagan valley, had passed away on July 12th. He was aged fifty years, three months and nine days. The funeral took place on July 14th, service being held in the Presbyterian church and the interment was in the cemetery at Armstrong, B.C.

GOOD DEMAND FOR WETASKIWIN HOGS

Johnsen Bros. made another large shipment of hogs to the Montreal market recently. Last week they shipped four cars and the week before they shipped three cars to the same market. There is a good demand for the quality of pork raised in the Wetsaskin district.

THE REVISED VERSION

Thirty days hath September,
April June and November;
And the rest are thirty less,
Unless you make your own home brew.

WETASKIWIN BEATS BITTERN LAKE BASEBALL TEAM

One of the best baseball games witnessed on the local diamond this season was played on Thursday evening, the competing teams being Bittern Lake and Wetsaskin. Owing to the visitors having some auto trouble on the way, they were late in arriving, but when the game started it was a game of strategy and fast. The feature of the game was the heavy hitting and good fielding. Although both pitchers were freely hit, the most of the long drives were captured by the fielders. Hanson struck out two of his opponents, while Harvey, the home twirler, had five to his credit. The heaviest hit of the evening was made by Gouchee, which gave him a home run. This in a sense redeemed him after the several costly errors he made around third corner. Frank MacArthur was the umpire until the fifth inning, when one of the decisions at home plate was questioned and the visitors became dissatisfied. O. Torpensen then officiated for the remainder of the game.

TOWN TOPICS

The host of friends of Mrs. C. R. Shantz are glad to know that she is reported to be recovering from a recent stroke.

Mr. Macfarlane and family and the Misses Macfarlane are expected to leave this week to join the campers there for a few days.

About fifteen of the boys scouts of Wetsaskin joined the contingent from Edmonton on Saturday afternoon on their way to Oull Lake, where they will spend a couple of weeks. There were 216 from Edmonton, and they were going down in three special cars. Mr. J. G. Griffith was the official accompanying the boys from Wetsaskin, but he was obliged to return Sunday.

HEART FAILURE WHILE IN WATER ALBERTA BEACH

Theodore Roosevelt Alexander, 12 years old, of Edmonton, was drowned at Alberta Beach Sunday afternoon, at 3:30 o'clock. He, with other boys, had been playing baseball for the entire morning and the early part of the afternoon, when they decided to go for a swim. He dived to the bottom and came to the surface without showing any ill effects of the plunge. He then took a second dive, but failed to come up. After a very short while his friends went in and found the body. They carried it ashore and attempted artificial respiration, but failed to effect resuscitation. A physician was summoned and pronounced the lad dead. In addition he passed a verdict of heart failure as the cause.

NORRIS GOVT. MEETS DEFEAT AT HANDS OF MANITOBA ELECTORS

Winnipeg, July 19.—Manitoba is to have a government of United Farmers following the provincial election, the results of which will be set out by the province of Alberta.

Yesterday the Liberal government of Hon. T. C. Norris went to the polls to face a vote of confidence and a referendum on the issue of the province's future. The Liberal government was defeated by a large margin.

The United Farmers, who have been in the opposition for some time, were victorious in the election. The results of the election were as follows:

United Farmers 24
Liberal 4
Conservative 4
Independent 7
Labor 2

Dixon, Labor, is the only Winnipeg member to be elected on first choice. Indications are, however, that Winnipeg will elect three Liberals, three Conservatives, one Independent and one Progressive. If this is the case the standing in the province with three deferred elections to come will be as follows:

United Farmers 25
Liberal 8
Conservative 6
Independent 5
Labor 1

It is thought that the Farmers will have no difficulty in securing the support from the deferred elections and Independents elected of the three or additional members required to enable them to carry on with a clear majority.

With all constituencies outside of Winnipeg held from, although the returns from some are very incomplete, it appears that aside from Winnipeg's own seats the standing of the parties will be as follows:

United Farmers 24
Liberal 4
Conservative 4
Independent 7
Labor 2

EVAN. LUTHERAN SYNOD RECALLS PIONEER DAYS

Local Celebration at Peace Hill Attended by about One Thousand People. Synod Formed Seventy-Five Years Ago by Twelve Congregations. Sermons by Prof. Schwermann and Revs. W. C. Eifert and Alf. Rehwinkel.

Sunday, July 16th, will long be remembered by Lutherans in our community. From early morning until the close of day numbers collected at the Lutheran church at Peace Hill, where a shady spot had been set in order and necessary conveniences arranged. Here members and friends of the nine Lutheran congregations spread over the territory from Niska to Ponoka and from the north to Camrose, listened to three sermons, joined in the singing of hymns, and thus worshipped Him who has signally blessed their church for these 75 years. The choir from Edmonton and Leduc, headed a joint choir of 42 voices from our own neighborhoods, plus a band of 23 instruments, helped make the day a mark of success. In the morning an impressive sermon was delivered by Prof. A. H. Schwermann, who still enjoys a favorable acquaintance with many in our city, having been stationed here for more than five years. After all had partaken of necessary refreshment, they again sat down to hear the Rev. W. C. Eifert preach a German sermon, followed by one of the most forceful sermons delivered by the Rev. Alf. Rehwinkel, M.A., B.D., of Edmonton.

To give a general view of the contents of all these addresses and also of the Lutheran Synod, its beginnings and glorious development, we add the following:

On April 26, 1847, twelve ministers of the Gospel gathered in Chicago at a meeting which was destined to mark the beginning of one of the most remarkable movements in the history of the Christian church in the United States, and formed what is now known as the Evangelical Lutheran Synod of Missouri, Ohio and other states, this church-body which this year celebrates its seventy-fifth anniversary.

During the three-quarters of a century which have passed since Dr. C. F. W. Walther, the concentrated leader of the Saxon immigrants in Missouri, assumed the presidency of this Synod, this church body has experienced a growth that is nothing short of phenomenal. Its pastors have increased from the original twelve to 2,500; its congregations from the sixteen that were represented in Chicago on the day of the organization to 3,200 with 1,000 additional preaching stations. Its membership embraces more than one million souls in all parts of the United States and Canada, and together with other synods affiliated in the Synodical Conference it forms the largest Lutheran church body in the world.

The secret of this growth is to be found in the fact that from its beginning this church was determined to accept the great missionary challenge that came from the unchurched masses in this country. With sacrifices almost unknown in those days, the first missionaries of this church labored.

Since the trials and struggles of those pioneer days this home missionary effort has increased to such an extent that with the exception of South Carolina, every county in the Union is represented in the home mission field of this church. From Maine where the determined members of the first mission congregation have built a Lutheran church with their own hands, to California, where this body has for many years carried on extensive home mission work; from the frozen northlands of Alberta and Saskatchewan, where the first Canadian Lutheran college has been erected to recruit young men for the missionary task in that great northwest, into the heart of Mexico, where Lutheran missionaries are now active in the cause of salvation; into the industrial and commercial centers of our country and in the isolated settlements where the gospel has never been preached before, these ambassadors of Jesus Christ are daily winning new victories for the faith "that overcometh the world."

Their testimony is heard in ten different languages in our country, in German, in English, which is being used more extensively every year, especially in missionary work, in the German language of the pioneer Lutheran workers. In Yiddish it is the Israelites of Christ as the promised Messiah in Italian this gospel is combating the atheism and religious indifference which is becoming rampant among the sons of Italy in this country; in Polish, Slovak, Lithuanian, Lettish, Norwegian and Danish it brings the gospel to the people who have come from the north of Europe; it greets the Indian in his own tongue and the unfortunate deaf mutes are happy to be under the spiritual care of men trained to bring the message of salvation in the sign language. For the past fifty years, ever since the

(Continued on Back Page)

GERMANY SUSPENDS PAYMENT ON HER PRE-WAR DEBTS

Paris, July 4.—Dr. Wilhelm Mayor, of the German government, has informed the French government that Germany plans to suspend payments of her pre-war commercial debts on which six hundred million gold marks will be due this year, according to German calculations. This sum is entirely outside the subject of reparations and is a matter for the government to consider as a basis for cash payments in reparations.

It is understood that the French government is firmly determined to resist all attempts until the reparations commission shall have exhausted all means given to it under the terms of the Versailles treaty to enforce collections of reparations.

JAPAN WANTS PRICE ON FROZEN BEEF

Inquiries are being made by a large Asiatic concern, with branches in Japan and China, who desire to hear from Canadian packing houses who are in a position to ship frozen beef to Japan.

The Commercial Intelligence Journal for July 8, in which the inquiry appears, adds that this is an excellent opportunity for Canadian packers to enter the Japanese market.

Mrs. A. H. Bowler of Selkirk, B.C., is a woman who has won the first prize in the butter prize class, and in the 20 pound pack of butter at the Edmonton fair, and with that the silver medal for the best grade of butter in the dairy classes.

PATRONIZE THE PAPER PRINTERS

Persons who Patronize Papers should Pay Promptly, for the Pecuniary Prospects of the Press have a Public Power of Pushing forward Public Property. If the Printer is Paid Promptly and his Paper is sold, he is a Pleasure to the People. Pass this bit of Philosophy into some Place where all Persons can Perceive it.

MEDICAL COMPOUND
RHEUMATISM'S
Greatest Enemy
For All Diseases of the
Blood
For Sciatica, Lumbago or
Rheumatism, it has no
equal.
It took 24 boxes, but it got re-
sults. I was suffering with rheumatism
in my legs, hips, shoulders,
arms and hands. My muscles
were swollen twice their natural
size. I was unable to work—con-
fined to the house—when a friend
advised me to try VERNO. After
taking 6 boxes I was able to do a
little work, and thinking I would
get all right, discontinued taking
it; but I was soon confined to the
house again. Again I started tak-
ing VERNO, and took 18 boxes
more. I never was so thankful
for anything in my life. I have not
lost one day's work since, and my
pains and aches have all left.
"If you have rheumatism, take
VERNO and stay with it."

ALBERTA CENSOR TALKS TO MOVIE ASSOCIATION

After concluding a successful two-day convention, the Alberta Motion Picture Theatre association rounded off its labors in fine style by staging an elaborate and sumptuous banquet at the Macdonald in Edmonton. Howard Douglas, chief of the Alberta Censor Board, was the guest of honor, and delivered an address on the aims and objects of his department. He said: "With regard to censorship generally, our board is guided by the broad principle that nothing should be passed which is calculated to demoralize an audience or that teaches methods of crime or undermines the respectability of society or that brings the institution of marriage into contempt. The question of religious observance is very carefully considered. Also subjects calculated to insure that there is always a certain amount of decency. Our board considers it very essential that no halo be placed round the heads of delinquents or criminals. We believe that a good play can stand on its own merits and not on the prestige of the particular star that illuminates it. No star, however famous, can make a bad play go over. Sensational publicity and reports of fabulous salaries are no longer good drawing cards."

"We all know the scandalous reports on some of the Hollywood stars which tend to lower the status of the whole moving picture business. I believe the motion picture industry is quite big enough to move quietly away from these people and leave them to their demerit. This will have the effect of hastening a new era. When motion pictures will stand on their own merits and when tortured hard working people will supersede physical and moral freaks."

"We believe that to accomplish the result of fine clean entertainment is not merely to fight the evil, but to try and increase the demand for good films. And we contemplate publishing a list of films found to be free from objectionable features and that would be suitable for exhibition to any audience, including father, mother and the young people. We think the best companies will seek to have pictures on this list and will strive to eliminate anything that will stand in the way of being approved."

"Many of the pictures that have recently come to us show conclusively that producers are endeavoring to put on clean and intelligent drama, and that the leaders in the industry are endeavoring to recognize that merit in pictures the same as in other fields of endeavor that it brings its own reward. It has been fully demonstrated to the producers that clean and wholesome pictures are the ones that bring the largest financial returns and will there are a few who still desire to cater to the lower instincts of the human race and present unclean and indecent pictures. This number he is in the great minority. Every intelligent person must wish the motion picture well. They are invaluable factors in stimulating imagination and promoting education—two very important things."

A QUEER TRADE

All manner of queer trades flourish in Paris. Some Parisians devote themselves to the raising of bird food. At one time the inhabitants of a certain quarter were attacked by an inexplicable irritation of the skin. All up and down one street people were scratching themselves from morning to night, and this lasted till the dwellers in that quarter looked like a colony of lepers. Finally the authorities looked into the matter and discovered that the doling of a certain Mann's Mole was the cause of the difficulty. She was a breeder of all sorts of birds, and more strictly speaking, a raiser of ants' eggs for the fattening of pheasants. When the police visited her establishment they encountered a woman of a most forbidding aspect. Her face and hands were as completely tanned as if they had undergone a dressing by a skilful furrier. The work had been done by the bites of the ants protected the rest of her person by wearing a close fitting suit of leather. Thus protected, she slept in perfect security, surrounded by sacks of her lively merchandise.

IMPROVED CROP CONDITIONS HELP TRADE VOLUME

Winnipeg, July 16.—Continued fine weather throughout the three prairie provinces and splendid crop conditions are having a good effect on trade in the west, says the weekly report of the Canadian Credit Men's Trust association, issued here Friday. Advertisers from Montreal, Toronto, Brandon and Quebec say that wholesalers find business on a "steady up grade." Activity is apparent in groceries, dry goods, textiles, men's and ladies' wear, and leathers. Hardware and lumber is more active than of late. Retail trade in country towns shows a slight improvement over a month ago, and, taken altogether, the pointing of the trade index can be considered satisfactory.

Winnipeg and Western wholesalers and manufacturers are gratified at the least crop weather over the west. Manitoba, with the exception of restricted areas, expects a good crop. Saskatchewan crop reports are very satisfactory with the exception of those around Saskatoon and from there to the Alberta boundary. Alberta advises show splendid conditions, especially in the southern part, and on these reports indications point to improved crops and collections during the coming fall.

NEW STYLE MOWING MACHINE INVENTED

Mr. William S. Goulet, of Wainwright, has invented a new mowing machine after some two years of study and experiment. Regarding this the Edmonton Journal says: "A very interesting demonstration was made at the University of Alberta in a moving machine manufactured by the Canadian Farm Implement company, of Medicine Hat, Alberta, was used to cut a straggling crop of sweet clover on the university farm."

"This machine is operated with two knives, working one above the other, similar to a pair of clippers, thus eliminating the roller plate as used in the old type machine. "It was a treat to watch the machine in operation. There was a total absence of vibration with practically no side draft. The machine plows about forty per cent lighter than the old type, and the knives are self sharpening. This demonstration was supervised by the permission of Professor O'Neil, director of field husbandry. "The machine has been named the "Wonder Mower."

REWARD FOR BREVITY

The story is told of Dr. Abernethy, the famous Scotch surgeon, a man of few words, that he once met his match—in a woman. She called at his office in Edinburgh one day with a hand badly inflamed and swollen. The following dialogue, opened by the doctor, took place: "What's the matter?" "Bruise." "Painful?" "Nothing." "The next day the woman called and they spoke as follows: "Better?" "Worse!" "Painful?" "Nothing!" "Two days later the woman made another call. "Better?" "Worse!" "Painful?" "Nothing!" "Most sensible woman I ever saw."

The Quitter

When you're lost in the wild, and you're scared as a child, And death looks you hang in the eye, And you're sore as a bull, it's accurate— "Go to!" To cock your revolver and—die! But the cane of Man says: "Fight all you can." And self-dissolution is barred, In hunger and woe, oh, it's easy to blow. It's the hell-served-for-breakfast that's hard. "You're sick of the game?" Well, now that's a shame. You're young, and you're brave, and you're bright. "I've got a new deal!" I know, but don't squeal! Buck up, you do your darndest and fight. It's the plugging away that will win you the day. So to be a piker, old pard. Just draw on your grit; it's easy to quit. It's the keeping-your-chin-up that's hard. It's easy to cry that you're beaten, and die; It's easy to crawl and crawl; But to fight and to fight when hope's out of sight! Why, that's the best game of them all! And though you come out of each crowd you're a loser. All broken and beaten and scarred, Just have one more try—it's dead easy to die, It's the keeping-on-living that's hard. —Selected.

Fashionable Modiste Tells Of Big Change

General Breakdown Entirely
Overcome by Tanlac and
Nerves Steady as a Clock
—Dignation now Perfect.

"I suffered a general breakdown about a year ago and until the time I started taking Tanlac I was in miserable health," said Mrs. John Nixon, well-known dress-maker of 631 Prior St., Vancouver, B.C.

"I was so nervous I was almost hysterical, and suffered terribly from headaches. Heartburn bothered me a great deal, and I had terrible pains in my stomach. I lost so much energy and strength that I was almost a wreck."

"But I am happy to say that things are different now. I am not the least bit nervous and sleep every night, and my appetite is so good I can eat anything. Tanlac has given me back my health and I would be ungrateful not to tell everybody I can about it." Tanlac is sold at all good druggists.

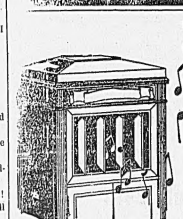

UNIVERSAL GRIEF

According to dispatches, there's trouble everywhere, and anguish comes in batches, and stationers run their hair in China there's been fighting, to gain the diamond belt; the Russian role is blighting, its evils now are felt. The monarchists are plotting wherever kings are crowned, and the monarchists are ruling in every foreign land. Grief, grief! See Ireland grab it; she now has freedom's boon, but has the scrupulous phill, and cannot drop it soon. Poor France is badly busted, by Prussian armies wrecked; her statesmen are disgusted because she can't collect. And even stalwart Britain, that never quailed before, by grievous mischance, and smiles and sings no more. Alas the sad dispatches, from groaning nations sent! The reader sighs and scratches his head in wonderment. How can one read such tidings, such news from o'er the foam, and fill the air with chidings, and beef around at

IN BED 9 WEEKS WITH DROPSY

Used Doan's Kidney Pills

Mrs. Fred Appleby, Heath, Alta., writes us under date of April 10th, 1921:—"I wish to express to you the benefit I have received from using Doan's Kidney Pills. About ten years ago, when I was seventeen years of age, I was in bed nine weeks with a very severe case of dropsy. I was terribly swollen up around my waist and was kept propped up so that the water would not get to my heart. The doctor gave me the water to live—when my Aunt got me "Doan's Pills." I had passed no water for two weeks, but after I had taken one box I passed a pint, and after taking three boxes I was up and quite well again, and I have never had any return of that awful trouble. "Doan's Kidney Pills are 50c. per box at all dealers, or mailed direct on receipt of price by The T. Milburn Co., Limited, Toronto, Ont."

RECORD DEMAND IS EXPECTED FOR HARVEST HANDS

Montreal, July 13.—The demand for the western harvest fields this year will exceed that of other years. Last year the number of men going from the east was 30,000. This year, in all probability, according to a prominent official of the Canadian Pacific railway, the requirements of the west will be approximately 60,000. Crop conditions from all quarters indicate that conditions in the west are very satisfactory, and the first trainload of harvesters will leave here probably about August 11 or 12.

A teacher found it difficult to make a boy in his class understand a point in his lesson. Finally, however, he succeeded, and, drawing a long breath, remarked: "If it wasn't for me, you would be the greatest dunkey in this town."

Ford For that vacation trip

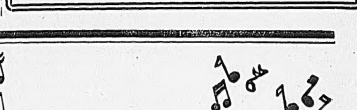

A Ford holiday is a real holiday. You go when you like and stop wherever the fancy strikes you. You make your own timetable or travel without one. You see everything on the way that is worth seeing and you are out in the open air all the time—not cooped up in a stuffy train.

Try a Ford holiday this summer, you will enjoy the freedom of it, and appreciate the economy of it.

We will be glad to extend very easy terms on the purchase of a car.

A Convincing Warning for Auto Speeders

At a railroad crossing in Texas has been erected a unique "Stop-Look-Listen" warning, as shown above. Perched high on its specially constructed pedestal, the wreck of an auto, with which some foolish driver once tried to beat a train to a crossing, presents a convincing argument for care and caution.

\$20 a Pound for California Rooster

Miss Marie Arlsen saw "Mike," a white leghorn rooster, at the recent show in Petaluma, Calif., and decided then and there she must have him for her poultry ranch. So she bid up to \$182.50 and got him, top price for nine pounds of fowl meat.

RIDING MASTER
WON MCCORMICK

First picture to reach the United States of Max Oster, 47-year-old Swiss riding master who is a 17-year-old Naible McCormick, heiress to International Western millions and granddaughter of John D. Rockefeller.

Edmonton Weekly News Bulletin

Alberta Bond Sale

In spite of the present unsatisfactory state of the bond market, the Alberta government was able during the past week to dispose of an issue of \$3,500,000 five year five-and-a-half per cent bonds at a price of 92.14. The purchasers were a syndicate composed of Wood Gundy & Co., Toronto, the Dominion Securities Co. and Biltmore & Co. of New York. The sale was made on private bids, after open bids on the bonds with a 20 per cent premium had been rejected as too low. The price finally received was considered most satisfactory under present conditions.

Alberta Butter Stands High

During the recent exhibitions at Calgary and Edmonton, butter made in Alberta captured a great many of the prizes offered. The butter at Calgary, exhibited by various producers in the province, was judged by Commissioner Gibson, Dairy Commissioner of Manitoba, who said that unquestionably Alberta butter was the finest in Canada.

Stock Judging Competition

The stock judging team of three students from the Gleichen school of agriculture was successful in winning the judging competition held at Calgary during the exhibition there. The competition being for a silver trophy offered by the department of agriculture and the staffs of the agricultural schools. The cup was competed for this year for the first time. Judges were G. H. Hutton, C.P.R., Calgary; Prof. Lattimer, Alberta University; Prof. Bowdell, Alberta University; Alex. Galbraith, department of agriculture and Walter Crawford. Classes were held in beef and dairy cattle, horses, sheep and swine. The competition was keenly contested and the contestants displayed good training and study.

From Nebraska by Car

Two agricultural college students from the university of Nebraska are visitors at the parliament buildings the past week, having driven up from Nebraska in a Ford car. They are touring Western Canada, and supplying Nebraska papers with articles on the attractions of the country. They expressed themselves very much pleased with Alberta.

Teachers' Summer School

Over 600 teachers from all parts of the province are attending the annual summer school now in progress at the university, under the auspices of the provincial department of education, and under the supervision of G. F. McNally, supervisor of schools.

The Alberta government has decided against giving aid to the Salvation Army scheme for bringing a number of women and children to Canada from Britain.

Spruce lumber from Alberta is very highly priced in the Eastern States according to a prominent lumberman who was a visitor to Edmonton during the past week.

Motion picture producers of Alberta

meeting in convention in Edmonton have expressed satisfaction with the censorship of pictures as carried on in Alberta, and have expressed confidence in the present censorship board.

Natural Gas Question

An investigation into the entire natural gas question in the province which will produce information for the provincial government upon which it will act in respect to present problems, and upon which it may have a future policy with respect to the whole question, is to be made by Judge A. A. Carpenter of the public utilities board. The government reached this decision during the past week, and a list of twelve questions has been submitted to Judge Carpenter. Briefly the questions will seek information on the following points:

Present production of gas in the province, existing wells and capacity and owners.

Present volume of consumption by municipalities for domestic and industrial purposes.

Industrial concerns using gas now and minimum amount required by such, and price and terms on which they are now supplied.

Agreements now existing between municipalities and corporations.

Effects of transporting gas out of any field on municipalities now using gas.

Methods of greater conservation of gas.

Ability of those now distributing gas to give an adequate supply.

Agreements now existing affecting supply to any municipality.

Present methods of regulation elsewhere than in Alberta.

Methods of treating pipe lines as common carriers elsewhere.

Treatment for poisoned Stock.

In several places in the southern part of the province it has been found that cattle and other animals have become poisoned by eating bait for grasshoppers which has been scattered in fields, since the bait contains arsenic. Dr. Percy Talbot, the provincial veterinarian, has issued a statement following a study of the matter.

Short Course for Children

One of the most interesting experiments yet tried by the provincial department of agriculture and one which is proving immensely successful is the short course school of a week's duration held at the Old school of agriculture for 60 boys and girls, winners at the school fairs of last year in seventeen districts from Wetaskiwin south to Didsbury. The boys and girls attending this course ranged in age from 9 to 15, and some of them had never been farther away from home than their own agricultural family. The young students were given instruction in many subjects, such as taking sowing, cooking and horticulture, and the boys being given lessons in farm engineering, stock raising, grain judging, soil cultivation, horticulture, carpentry and other branches of agriculture. The instruction is being given by the staff of the Old school of agriculture,

headed by Principal P. S. Grisdale, who, together with Nelson Smith, M.L.A. for Olds, originated the course. Provision for recreation was also made, and the week proved to be a most interesting one for the young students. Among the outsiders who spoke to the boys and girls were Nelson Smith, M.L.A., Olds; G. W. Smith, M.L.A., Red Deer; W. J. Stephens, crop commissioner of the province, and Alex. Galbraith, superintendent of fairs and institutes. Under the direction of C. G. Groff, publicity commissioner, motion pictures and other photos were taken of the students and the classes.

During the past week Hon. Chas. Stewart, minister of the interior, has been in consultation with the provincial cabinet in the matter of immigration policy and co-operation of the provincial and dominion authorities in bringing settlers into the province.

W. C. T. U.

The Retail Grocers' Association of Vancouver have declared in favor of a bone dry province, and have taken the preliminary steps to reach their objective, one reason being given for their action being the fact that \$10,000, which is greatly needed for food and comforts of life at this time is being wasted daily for liquor in the city alone, and all legitimate trade is suffering in consequence.

Will the six vicious attacks which are being made on the Alberta liquor law and on those who stand for its enforcement, by such perils as "Liberty" of Calgary, have the effect of inducing more aggressive effort from our well-meaning but possibly sometimes too self-satisfied prohibitionists?

If "the attack usually beats the defence" only the offensive will be at present secure victory; for our enemy is active as probably never before and many of our people have come in because we voted out this same intention, the law which a wet petition now being circulated would practically ask the government to allow the sale of by any person to every person.

"Scarlight" says: "Public sentiment must rally again to the support of the Alberta Liquor Act."

BORN

SMITH—At Wetaskiwin, on Monday, July 17th, to Mr. and Mrs. C. D. Smith, a son.

SMITH—In Wetaskiwin on the 13th inst., to Mr. and Mrs. A. M. Smith, a son.

DORN—To Mr. and Mrs. S. B. Lane of Edmonton on July 4th, a daughter, Margaret Ida Shirley.

George Wiseman of the Dominion Express Co., leaves this week to spend his vacation at Red Deer, Calgary and Banff. His duties here will be assumed by Mr. McDougall, relieving agent.

Looking Backward
FROM THE TIMES FILES

From The Times June 19, 1902.

Chas. Olin has a gang of workmen busily engaged erecting a building on the lot between Ward's drug store and the Massey-Harris building. After July 1st this building will be the home of The Times.

The Indian Reserve correspondent says: E. E. Chandler, our farmer, is giving his house a coat of paint, which adds much to the appearance of the place.

There is a great boom on at Wetaskiwin. This is the point on the C. & E. from which the Beaver Lake and Vermilion districts are easiest reached, and the place is crowded with settlers on their way to these places. Sleeping accommodations cannot be got and the crowds are compelled to fare the best they can round the town. The roads are in the worst possible condition, but this does not deter the land seekers from going forth in search of land, even if they have to wade through the sloughs.

Owing to ill-health L. T. McQueen has been compelled to give up the booting business.

John West sold a lot between a lot between Ward's drug store and the butcher shop to a Lacombe man for \$1,600. The lot has a frontage of 25 feet.

Wetaskiwin now boasts of having one of the best post offices in the west. Sixty boxes were added last week.

From The Times June 26th, 1902.

Nils Johnson confessed to the murder of Peter J. Johnson near Hay Lakes during a quarrel. The deed was committed on July 9th.

A grand musical and dramatic entertainment was given in Heric's hall on Coronation night, when "The Man on the Street" and "The Rascal Hunter" were given. Those taking part were P. A. Miquelon, J. W. Byers, Miss Ada McColeman, Mrs. J. Y. Byers, Walter Clarke, J. Soughman, Herr Braumann and R. L. Johnson, E. T. Jacobs and W. H. Pacey.

Dr. Hall, dentist, late of Great Falls, Montana, has located permanently at Wetaskiwin.

This season Mr. Sharman, agent for Manitoba purchased stock, has brought in five loads of pure bred from Manitoba.

From The Times May 23rd, 1912.

Empire Day was suitably celebrated by the children of the public schools forming in line and marching through the principal streets. They were addressed by J. P. Fowler, chairman of the board and Rev. C. E. A. Pocock and A. R. Aldridge.

The Albert Hotel changed hands. G. Frisch selected to Frank E. Fisher & Co. of Minneapolis for \$55,000.

At the musical festival Mrs. H. J. Montgomery and J. Gordon, organists as soloists, and Miss Florence Kelly received second in sight playing. The Wetaskiwin Ladies' Chorus also won second in their class.

H. I. Gull, who has been travelling the interests of the Hercules Rotary Engine Co., has returned to the city after a successful business trip.

Duncan McPhail, recently appointed fire guard, has returned from a tour of his territory.

From The Times May 30, 1912.

There is a persistent rumor in business circles that the Canadian Northern railway will enter this city in the near future. Surveyors are working within a few miles of the city and are heading this way. It is understood that the Great Northern would like to project a line to Wetaskiwin.

Premier Sifton was my all-by-elections and all his cabinet appointments are in his territory.

Board of Trade is calling for tenders for the erection of an octagon shaped building to be used as an office. M. M. Gillis, a newspaper man of Calgary, has been engaged as secretary.

Hugh McGonigle, D.L.S. left for the Jasper Park country last week to spend the summer surveying.

At the Edmonton races Geo. L. Owen's Geo. Allen's and L. E. Standefer's horses made a good showing, winning several races and seconds.

Through the generosity of H. S. Crile, means over the Merchants Bank will be used for Board of Trade purposes.

From The Times of June 3rd, 1912.

At a special meeting of the city council it was agreed with Mr. Grant, the contractor for drilling the gas wells, that he be allowed to abandon the well he is working at, and to start a new hole.

A popular wedding was solemnized in the Scandinavian church, when Miss Anna Olson and Mr. George Lencaster and Miss Olga Olson and Mr. Lawrence Miller were united in marriage.

The home of Mr. and Mrs. Jos. Choblick, Calgary, was the scene of a tea wedding, when Miss Vera Mary Choblick was united to Mr. Arthur G. Austin and Miss Ethel Florence Choblick was married to Dr. T. D. Stevenson, M.D., of Wetaskiwin.

The Wetaskiwin Produce Co. creamery was opened for the season a few days ago.

Principal Clothier, R. J. Gaunt and Mr. Charles Rogers from the school staff, and the applications of J. H. Hutchison, as principal, Miss Elizabeth Smith and Miss Owen McAdams were accepted.

Hays (Lounan), September 4-5.
Rocky Mountain House, Sept. 11-12.
Milton, September 27.

TREE PLANTING
IS BOOMING
ON THE PRAIRIES

Excellent proof that the prairie province resident has not lost his head through temporary business depression is provided by a statement of the Canadian Forestry Association that the popular interest in tree planting throughout the prairie provinces this year represents the highest mark in the history of the west. That the Canadian Forestry Association is in a good position to judge is indicated by the success attending their Tree Planting Car in this year's journey across the three prairie provinces. Although the lecture car will hold only about 100 persons at a time, it has accommodated since April 1st, and mostly in small communities, over 40,000 people. It has travelled in the same period close to 4,500 miles with 200 lectures to the credit of Mr. Archibald Mitchell, the chief officer in charge, and his assistant, Mr. Angus Cochrane. For some time the Tree Planting Car was attached to the Belted Farming Train of the Saskatchewan government which touched at two communities daily, Mr. Mitchell giving as many as 51 tree planting talks in a single week as well as practical demonstrations at advantageous prices showing how to plant trees, how to prune and how to combat destructive insects and fungus diseases. The Canadian Forestry Association's unique enterprise, which aims to give practical help to scores of thousands of prairie residents each year, and to stimulate popular interest in the planting of shelter belts about farms and improvement of farm conditions, has no connection with any but a citizen's undertaking entirely.

Sixth Crop Report

Issued by Publicity Commissioner, Department of Agriculture, Edmonton, Alberta.

Friday, July 14, 1922.

Alberta farmers enter the third week in July with crop prospects considerably improved over a month ago, owing to the late rains which have been fairly general over the province. These rains, while they have come too late in some districts to guarantee a heavy crop, have helped the late-sown grain considerably, and have made a fair crop certain where failures would have been the result. Taking the province as a whole, the grain crop will average up well. The hay crop is the central and northern districts will be light, but the late rains will produce a good deal of green feed. The southwestern areas are certain now of a crop that will exceed anything realized in that area for the past five years. The southwestern areas are expected alternately with frequent showers have visited many areas and have much improved the situation. In the central and northwestern areas, the grain has been retarded by drought to some extent, but it will make a light crop, but generally speaking the late heavy rains have brought on the later crops very satisfactorily.

South western areas.—Continued heavy rains have been experienced from Calgary south to Lethbridge and the boundary and westward, with the exception of a few districts on the Alameda branch, where the crop has suffered. The indications in the southwestern areas are for a heavier crop yield than has been experienced since 1915, and in some cases it is anticipated that the yields will be heavier than in 1915. A fairly cut crop has been in progress in the southwestern districts, and the yield will be fair. Some of this crop has been winter killed. Precipitation for first two weeks in July at Raymond was 2.3 inches, at Lethbridge 1.53, at Calgary 1.27 inches. Rye is four feet eight inches in height at Chechnish and Lethbridge, and wheat is two feet 35 per cent less than a year ago.

South eastern districts.—The districts east of Calgary on the C.P.R. main line and in the Medicine Hat section report further good local shows, and improved conditions as a result, though a few sections report damages from drought. Gleichen district reports rainfall 2.50 inches since June 25. Medicine Hat reports good crops of many parts of that district.

Central districts.—A fair average crop will be cut in these areas, there having been good rains along the eastern sections of the province north of the Red Deer river, and between the Red Deer and the C.P.R. line between Edmonton and Calgary several districts have suffered from lack of moisture, but recent rains have brought the late-sown crops along, and some crops of wheat which had not headed out, and the continuance of rain is now increasing the possibility of a good yield.

Northern areas.—Grande Prairie, Peace River and Whitecourt districts report that grain related there by dry weather is picking up with the later rains. Along the C.N.R. north of the Saskatchewan river, reports give indications of splendid conditions and hopes of a heavy yield of grain.

Grasshoppers.—With the campaign against the grasshoppers nearing its close, the reports confirm the belief that this pest has done very little damage to the crops this year, due to the vigorous and continued poisoning campaign.

Hail.—Very few reports of damage from hail are being received so far. Against the grasshoppers, the estimates of the area in crop this year give the wheat average at 5,232,000 acres, oats 2,832,000 acres, barley 522,000, rye 280,000, mixed grains 1,000,000, hay and clover 450,000 and alfalfa 30,000. Wheat shows an increase over last year by about 5 per cent and rye an increase of 30 per cent. The potato acreage has been reduced about 4 per cent this year.

The first time a monoplane, like a great dragonfly, sailed over a certain sleepy little Scotch town, a couple of old timers got the scare of their lives. "Lord save us, Sandy!" cried one, giving up the word. "What do ye think it is?" "I ken weel it's a sign!" "An' what kind o' a sign, Sandy?" "What kind o' a sign, mon! dinna ye ken! Sure it's a sign ye an' me, Tammas, must cut our 't' whaukey."

Singers who appeared with success in the special reports were members of the Edmonton Operatic concert party, including Mrs. Leonard Willing, Miss Pauline Maloy, Miss Elizabeth Howard and Miss Doris Knight. Accompanists during the week were Martin McGee and Miss Florence Kelley—Edmonton Journal.

HOW THE CIGARETTE INJURES HEALTH

First Prize Essay in Grade VIII

By Helen Higgs

Tobacco was first introduced into Europe in the year fifteen hundred and fifty-nine. Previous to this the American Indians smoked. From him the white man took the habit.

Tobacco is used in the form of cigars, cigarettes, snuff, pipe and chewing tobacco.

The cigarette, now so much used in smoking, is filled with snuff cut to smoke covered with especially manufactured papers. These papers are said to be poisonous as well as the tobacco. Some of the papers contain the principal constituent of tobacco is nicotine. Besides this tobacco contains carbon dioxide, ammonium, cyanide, pyridine, acrolein and other substances in small quantities but very poisonous.

Men become slaves to tobacco and often lose their health and become subject to disease. Tobacco impairs the digestive organs, it weakens the regular beat of the heart and weakens the nervous system. The stomach through this stimulant is made to work overtime. Smoke causes inflammation and pain to the eyes. Some smokers have red congested throats and dry coughs.

Tobacco smoke attacks the most vital organ, the heart. The work of the heart is very much overtaxed. The reserved power of the heart is used up every day so that the smoker has no reserve to draw upon in case of sickness.

If smoke will irritate the eyes and throat it will also irritate the delicate lining of the lungs and thus make them less resistant to disease.

Tobacco prevents the nerves from growing as strong as they should, and makes them in the end more irritable. The effect may easily be noticed in the trembling of the hand in boys who smoke.

Cigarettes are fast making criminals of our children. A tobacco smoker or has no consideration for others. A great deal of juvenile crime consists of petty thieving to secure money to purchase cigarettes. One habit is responsible for the trouble of thousands of boys who have degraded themselves and their parents is the vile cigarette habit. The cigarette attacks the boy from the mental side. A boy who smokes has a weak memory, and is unable to concentrate, lack of reasoning power and a weakened will.

Any boy whose life in life is to be an athlete must never smoke. Athletes who indulge in tobacco of any kind are sure to lose their athletic prowess. Famous athlete Mike Donovan says that any boy who smokes can never succeed in any line.

Calgary, Alta.—After covering six hundred miles in the southern portion of Alberta, at the end of June, J. M. Cameron, general superintendent of the Alberta Division of the Canadian Pacific Railway, de-termined to hold four conventions under similar conditions.

Mr. R. Travis, manager of the hotel provided an excellent meeting place, and the records show more discussion than at any four conventions of the past, while there has been more fraternizing by the delegates who were now one another to a greater degree than ever before. During the afternoon days delegates and golf on the beautiful links overlooking the sea and indulged in swimming in Kaituma Bay.

Mr. Cameron stated that farmers had been taught an object lesson by grasshoppers. Where there is no grasshopper, the farmer is able to produce a better crop. From the amount of damage done by grasshoppers, going on, farmers had realized that grubbing-in was a poor gamble and had a breeding place for the hoppers. The hoppers, he said, were now practically under control in the south. Carvermans had done little or no damage on account of the frequent showers.

"I have been much pleased with my visit," said Mr. Cameron. "There are about five years, through his ability to give the best he could and also because of his sterling integrity. He has been instrumental in forming this position until 20 years ago, when he desired a change of employment and was transferred to the pensioning station staff. For a while he worked at Fleming and Vickers, his new company and eventually assumed charge of the Elkhorn pensioning station, on the retirement of Mr. Travis, another old time railway man who is still with us, hale and hearty as ever."

A record such as Mr. Cameron's is a credit to the railway. It is the second highest number in the division, and his regularity and strict attention to his duties have won him the deep respect of the company, which places high value on the services of men of his caliber. He has a great knowledge of an "exacting record" and is a man that must reflect credit to the railway.

Elkhorn, Man.—Forty years ago Mr. Jas. Rodgers commenced working for the Canadian Pacific Railway Company, as a section man, and in about five years, through his ability to give the best he could and also because of his sterling integrity, he was promoted to foreman of the section. He has been in this position until 20 years ago, when he desired a change of employment and was transferred to the pensioning station staff. For a while he worked at Fleming and Vickers, his new company and eventually assumed charge of the Elkhorn pensioning station, on the retirement of Mr. Travis, another old time railway man who is still with us, hale and hearty as ever."

Railway News

Nakusp, B.C.—As an indication of the increased industrial activity of the lumber mills of Nakusp, the Nakusp Lumber Company find their lumber so in demand that they have cleared about four acres of land near the first mile post along the C. P. R., where a sawmill will be built and the lumber hauled up in cars and allowed to dry before being shipped to outside points.

Invermere, B.C.—Amongst the many splendid summer publications of the C. P. R. are two of especial interest to the tourist. The first and one of "Bangalore Camps," and makes very generous mention of the beautiful Lake Windermere Camp adjoining this place. The other one is a publication given over exclusively to describing the local "Camps." This is a seventeen-page folder, most beautifully illustrated with reproductions of photographs of local scenes. The letter press is by Mr. Fredrick Niven.

The gist of the matter is descriptive of the various trails and automobile roads throughout the Windermere district.

Chatham, Ontario.—Wholesale summoning of boys and men so frequently use of C. P. R. tracks as a place for walks, was indicated in County Police court recently, when a summons was returned against a C. P. R. detective for obstructing a summons.

It is alleged that the defendant trespassed on the C. P. R. tracks, a short distance from the City in Harwich township.

Information has also been laid against seven boys under the age of sixteen years.

Montreal—Edward J. Riebel is appointed city passenger agent for the Canadian Pacific at Chicago, succeeding Alfred R. Dean, who has resigned to enter other business.

Mr. Riebel joined the service on June 16, 1920, as clerk in the passenger department, Canadian Pacific Steamships at Chicago. Promotions following were: October 1, 1920, chief clerk; January 21, 1921, passenger agent; June 1, 1921, traveling passenger agent; June 1, 1922, city passenger agent.

William J. Rankin is appointed traveling passenger agent, succeeding Edward J. Riebel. Mr. Rankin joined the Canadian Pacific as clerk in the steamship passenger department, Chicago on March 15, 1922.

St. Andrews-by-the-Sea, N.B.—The Canadian Manufacturers' Convention for 1922 is now a thing of the past. The convention was held at St. Andrews, N.B., from June 1 to 10, 1922. So much of a success has been this year's convention that it can be said without violating any confidences, that the most influential members of the association are anxious to hold future conventions under similar conditions.

The records show more discussion than at any four conventions of the past, while there has been more fraternizing by the delegates who were now one another to a greater degree than ever before. During the afternoon days delegates and golf on the beautiful links overlooking the sea and indulged in swimming in Kaituma Bay.

INTELLIGENCE
OF ANIMALS

In England a short time ago, says an exchange, a medal was awarded a Great Dane for saving his master's life. A roaring, deafening wind was blowing, and the man was walking along a dark Cheshire road with his head down.

The dog was some distance behind, but presently up he came at racing speed, took a jump at his master, and sent him sprawling into the hedge. The dog himself could not escape the front of the car, which, but for his intervention, would have killed his master, and was badly injured.

Quite recently an Irish terrier, of its own accord, paid repeated visits to a Croydon hospital for treatment, while in the boardroom of King's College Hospital, London, is a picture of two fox terriers escorting a wounded collic to that institution. The incident depicted is a true one. The owner of the dogs was a bookseller named Hunt, and his explanation of the dogs' sagacity was that they lived so near the hospital that they must have noticed people who had met with accidents taken there. They used their knowledge when their friend the collic, was run over by a cab.

Owners of bull terriers have countless stories to tell of their favorite breed. One of the best is of the animal which went to a dog show "on his own." He was a wonderful dog and had taken prizes everywhere, and his son reigned in his stead. Evidently however, he thought this was an oversight on the part of his master, which it was his duty to rectify. Consequently, he jumped through a kitchen window, over several walls, made his way through several miles of London's thickest traffic, and finally finished up at the Horticultural hall, where he took his place on the stand.

PROPOSALS FOR

BOUNDARY PACT

WELL RECEIVED

Washington, July 16.—Premier King and Hon. Geo. P. Graham, minister of national defence in the federal cabinet, divided their time Thursday morning between sightseeing and the holding of formal conferences with a number of members of the United States senate. The premier paid a visit to the tomb of George Washington at Mount Vernon, and saw other points of interest in the neighborhood of the United States capital. The afternoon was spent in seeing the senate in action and a visit to the vice-president.

Premier King's proposal for the modernization of the Rush-Bagot treaty relative to the naval forces on the Great Lakes, has created a strong impression here and is expected to receive warm support from the Washington statesmen. While the status of the St. Lawrence waterways project is not in any way changed by the visit of the Canadian premier, and this matter was touched on in Mr. King's conference with Secretary of State Hughes only momentarily, it is stated Premier King has been advised by United States senators and other public men here there is a strong feeling in Washington in favor of the project.

HOME BREW

Here a recipe for making cheap hop beer.
There's no doubt you'll think it rather queer,
But you'll own it's something new,
And with economy in view,
You can try it any time the road is clear:

Place a good sized Frog or Toad,
In the middle of the road;
Make him travel for a while, or till
"the hops"

Then with patience follow back,
Always keeping in the track
Till you've gathered up a good supply
of hops.

Place them all in water clear;
And if you would make good beer
You must strain it when its worked
or settling thick.

Then catch a good fat hopper;
Put him in and close the stopper;
He's the pucker that will add the final kick

**Nerves Were Bad After
Discharge From The Army**

Wherever there are people who are troubled with damaged nerves they will find in Miller's Heart and Nerve Pills a remedy that will restore the equilibrium of those damaged centres and bring back the shattered nervous system to a perfect condition.

Corp. J. Glebe, Oak, Machine Gun Corps, 123rd James St. Fort, Hamilton, Ont., writes:—"Since I was discharged from the army, June 10th, 1919, I have been suffering with my nerves. I have had to come home from work on many occasions, and finally lost my job. I was told to try Miller's Heart and Nerve Pills. I did so and after taking one box I felt a great change, and since then I would not be without them in the house, as I had tried everything people told me about. I recommended them to two of my clams who were in the same unit I served with overseas, and they have also been greatly helped."

Price 50c, a box at all dealers or mailed direct on receipt of price by The T. Miller Co., Limited, Toronto, Ont.

BEAR AND MULE
HAD ENCOUNTER

Prince George, B.C., July 15.—Two running bear stories, both vouched for by reputable eyewitnesses, are going the rounds here. Forest fires in northern British Columbia during the past month had a peculiar effect upon some of the wild animals of the woods, judging from some of the stories brought in here.

A fight between a fire crazed bear and a mule, in which the bear was worsted, took place at L. Mason's ranch at Belton.

The forest fire routed the bear from its lair, and in its dash from the flames into the open country it collided violently with a jack mule, which was grazing contentedly. The bear was promptly stretched out on the ground by a double tattoo from the capable hind hoofs, and the mule calmly resumed the interrupted grazing.

Thoroughly angered, the bear picked itself up and cautiously approached the mule from a different angle. The huge pay was brought down with a resounding crack on the mule's ribs. This was unfortunate. The hoofs were again brought into play after a quick accurate maneuver for position and the fight was called off as far as the bear was concerned.

Mr. Mason, who had witnessed the unusual occurrence, dashed to the house for a rifle to finish the bear should any life be left. Before he could get back to the scene, however, Bruin managed to get groggily to his feet and return to the less exciting environment of the forest fire.

A fire patrol ranger is sponsor for another bear story. While making a survey along the Grand Trunk Pacific railway into the mountain district, he came upon a young sub suffering from severe burns on feet and body. The youngster was whimpering from the pain, and the forester took pity on him and lashed him to his splinter.

The patrol man started on his journey only to discover that the number bear had appeared and was in hot pursuit. As the track ran uphill at this point the bear making long strides, gained steadily, and a need for strategy was clearly indicated. The forestry book of instructions does not cover such a situation as this, and the ranger decided that the best plan was to throw the cub off the car.

His attempts to untie the knot on the fastenings which secured the youngster to the machine, however, proved futile. Pursuer and pursued came to a yet steeper grade, with the advantage all with the former. Finally with one mighty effort the old bear threw herself on the back of the splinter, holding on with her claws and paws. This is where the forester, decided to resign in favor of the enemy. He dove off the car and regained his feet in time to see the splinter continuing its journey outward with a mother and child happily reunited as its passengers.

WESTERN CATTLE

PRICES KEPT UP COMPARATIVELY WELL

Ottawa, July 14.—The cattle markets in Western Canada have, according to the Dominion livestock branch, been holding up well, and have compared favorably with those of the same period of 1921. Unexpected and unusually marketing of grass cattle lately of poor condition is, however, having a very depressing effect on the market and prices have dropped rather sharply during the past week. Unless cattle of the quality mentioned are held back for better conditions, prices will likely go below those of last July, when \$5.50 a hundred was a top figure.

BITER BITTEN

A good story is going the rounds of the mining districts of Yife just now. A prominent orator connected with the miners in the course of street corner oration of the usual type, suggested, among other things, that the men should not starve as long as there was plenty of henroasts. The orator is a poultry fancier himself, and when he went to his own hen roost the next morning to feed his flock he found there was nothing to feed.

Written in chalk, however, on the wall were these words:—"Thanks for the advice—and hens."

WHEN YOU WANT PRINTING, SAY "TIMES"

LAWSON & CO., Limited
Good news for all who sew

THIS store now offers to its customers the Belrobe Method for home sewing. In managing her dress allowance it is every woman's pet ambition to combine the utmost in style with a real dollars-and-cents economy. And now the coming of the Belrobe Method makes it possible for even the least experienced to realize this ambition. If you follow the Belrobe Method the clothes that you make at home will have more style than you ever dreamed of, for less than you planned to spend.

BELROBE METHOD
for home sewing
saves from 50c to \$1000 on material alone

The Belrobe Method, with every new DESIGNER PATTERN, gives you the cutting-layout that a professional would use to save every possible inch of your material. These layouts are planned for every size and for every suitable width that you could use economically.

With a Belrobe Method layout you will often use as much as a yard less than you would otherwise have dared to depend on. This will mean a very considerable saving on your dress allowance.

Next, when you are putting the garment together, you will find a set of instructions—picturized, not fussily ex-

plained—to help you to seam, to drape, and to fit your dress exactly as you want it.

And finally, when you come to the last few stitches, there is a special set of instructions to help you get the mysterious little tricks of really smart finishing that you have never been able to copy or imitate.

The Belrobe Method is now included in the same envelope with DESIGNER PATTERNS. It can not be purchased separately. Ask to see it at our pattern counter—it will give you a new realization of what can be done with some of the beautiful materials that will be fashionable this summer.

FIVE CHILDREN**They Are Seldom Sick
Unless From Bowel
Trouble

Mrs. George Chapman, Sulbury, Ont., writes:—"I am the mother of five children, and I must say that they are seldom sick or in need of medicine. They are, however, sometimes troubled with Summer Complaint, Diarrhoea, and such like, but I always find that there is no cause for worry as I just give them two of these, no more, of Dr. Fowler's Extract of Wild Strawberry, and the trouble soon disappears. It is a remedy that all mothers should keep in the home for their children."

This old, tried, and proven medicine for Diarrhoea, Colic, Cramps, and Pain in the Stomach, Cholera, Cholera Morbus, Cholera Infantum, or any other Looseness of the Bowels, has been on the market for over 77 years, and we cannot help but recommend it as the very best preparation you can possibly use for all bowel troubles.

At the same time we wish to warn you against accepting a substitute for the original, the price of which is 50c per bottle, and put up only by The T. M. Milburn Co., Limited, Toronto, Ont.

An Exhibition from France

At the inauguration of the French train at Place Viger Station, Montreal. Amongst the officials shown in this photo are Prime Minister Meighen, Senator C. P. Beaulieu, Senator Smeaton White, Senator Dandurand, Count d'Arnaud, president of the train; M. de Lalonde, vice-consul of France in Montreal; Mr. E. Hebert, of the C.P.R., and Mr. Morrison, of the C.N.R.

Geo. Clemenceau's head by Rodin, the famous sculptor, which is on exhibit in the French train.

A Made-in-France exhibition train is now touring Canada, over the Canadian Pacific Railway. It was opened at the C. P. R. Place Viger Station, Montreal, on August 29th, amongst those present being Premier Arthur Meighen, Mayor Martin of Montreal, and Senator C. P. Beaulieu, who organized the bringing of the French exhibition goods to Canada and the tour of the train throughout the Dominion.

The object of the train carrying French goods is to promote cordial, social, and commercial relations, reciprocally advantageous to both countries.

The train consists of a baggage car, eight Pullman cars, a tourist car, a diner, and two sleeping cars. The eight coaches of the train carry goods representative of:

(1) The intellectual development of France;
(2) Industries, commerce and tourism;
(3) French styles;
(4) Leather industries;
(5) Chemical goods, perfumery;
(6) Instruments of various kinds, electrical goods, toys;
(7) Agriculture, horticulture, fairs;
(8) Jewellery, objects of art, clocks, watches.

But this list only gives an idea of the hundreds of things on exhibit. In the tour of the Dominion the train will travel a total of 7,200 miles.

During the four days which the train remained in Montreal it was visited by thousands of interested persons. It was a huge success at the Toronto Fair and is attracting large numbers everywhere it goes through the country.

A member of the staff of the Canadian Government commercial intelligence service is travelling with the train, partly in order to study the results obtained from a business survey furnished about and on at least one occasion has attended a woman, is arousing the deepest interest in psychic and scientific circles throughout Europe.

The facts in the case have been authenticated by the leading philosophical magazine published in England.

The ghost appeared to Mr. and Mrs. Nigel Kerr, an English couple, who are not spiritualists, according to this magazine. They recently decided to settle down in a town bordering one of the Italian lakes. They withdrew the name of the town from scientific investigations, for the purpose of preventing a rash of morbidly curious people.

Mr. and Mrs. Kerr bought the effects of two elderly Danish sisters. One of the sisters died. Her death was attributed in part by the surviving sister to her grief at having to part with her belongings. The surviving sister departed for Denmark after making over the lease of her house, Villa Vistaria, to Kerr.

The alleged ghostly visitations began as soon as the Kerrs moved into Villa Vistaria. Mr. and Mrs. Kerr occupied different bedrooms. The first evening Kerr, in bed, heard light footsteps on the stairs. At the top of the stairs the footsteps hesitated, he says. Then Kerr was aware of hands feeling the outside of the bedroom door. There was a bright light in the bedroom. Some the handle of the door, which was on the latch principle, moved upward. The door can only be opened when the handle is moved downward. Again Kerr heard the hands pass over the outside of the door and again the handle was moved upward. Kerr got out of bed and quickly opened the door. He could see nothing. He returned to bed, and then after a short interval heard the footsteps again. This time they were descending from the floor above, and finally they moved off.

Thereafter Kerr heard footsteps all night long, even when he was at home. They seemed more distinct in daylight. When he was reading the footsteps would pass in front of him. At various times the furniture on the floor above was shifted. On one occasion when Kerr arrived home at night footsteps rushed down the stairs toward him and he ran outside the street in fright. At no time was the phantom visible.

The psychic explanation is that the phantom was the ghost of the Danish sister, who was haunting her husband, the late Mr. Kerr, but which he was near her beloved possessions which the Kerrs had purchased. Some of these possessions in the trunk ready to be moved away, are believed by spiritualists to have

**SAID HE COULD
NEVER BE WELL****"Fruit-a-lives" Restored
Him to Health**

159 AVENUE PUIS IX, MONTREAL.
"For three years, I was a terrible sufferer from Dropsy and my general health was very bad. I consulted a physician and took his medicine but I did not improve; and finally he told me that I could not be cured.
At this time, a friend advised me to try 'Fruit-a-lives'. After taking two boxes, I was greatly relieved; and this fruit medicine made me completely well. My digestion and general health are now splendid!"

A negro had been brought into a Virginia police court for the fifth time charged with stealing cotton. The magistrate determined to appeal to the boy's father. "See here," said his honor, "this boy of yours has been in this court so many times on the same charge that I am quite tired of seeing him here." "I don't blame you, Judge," said the parent, "am I tired of seeing him here as you are?" "Then why don't you teach him how to act? Show him the right way and he won't be coming here." "I has showed him de right way," said the father, "but he jest don't seem to have no talent for learning how Judge; he always gets caught."

DANGEROUS CARGOES

"At first thought it would seem that dynamite was a cargo to be carefully avoided, but from a sailor's point of view there are far more dangerous cargoes. He dreads, for instance, a cargo of sugar. Put hundreds of tons of cane sugar in casks in the hold of a vessel and let the ship steam through a spell of hot weather. The odor is sickening. The sailors cannot get the sweet taste out of their mouths and crave vinegar or lime juice—anything sour. They lose their appetites and are always glad when a voyage on which the cargo was sugar is over. Coffee is no disagreeable as sugar, in addition to being very dangerous.

Cotton is a really dangerous cargo. If a little oil happens to touch raw cotton the result is spontaneous combustion. A single bale of cotton saturated with an oil such as kerosene, and lying at the bottom of a hold can be compared only to a slow match attached to a bomb.

Acids and chemicals form dangerous cargoes. Carbide of calcium, for instance. Acetylene gas is made from this chemical and the gas is constantly given off if the product is attached by iron off if the product is exposed to air.

Shlpmasters dislike to carry drums of acid where they cannot be reached easily. A Chilean ship recently put in at the Falkland Islands looking badly. Her cargo was made up of drums of acid and chalk. The acid had leaked from the drums and mixed with the chalk forming carbonic acid gas in the hold. This gas is deadly and the crew could not make repairs.

Meanwhile, the acid had gathered in the bottom of the ship and had entered away the iron frames there.

**ALBERTA GOVT.
BUYS SHORTHORN**Edmonton, July 16.—Hon. Geo. Hood-
ley, minister of agriculture, has completed the purchase for the government school farm at Olds of the "Prince of Wales" Shorthorn, a cow bred by the Prince of Wales on his home farm, and competent judges have pronounced her one of the very best Shorthorn females ever seen in Western Canada.

Princeton Benefactor was a year old July 22, and the government obtained him for the very modest sum of \$1000. Bulls of this famous strain of breeding would be much more nearly worth 1000 guineas in Britain, even in this day of low prices. It is understood the government is giving some of the Shorthorn cows from the Sedgewick farm to Olds, and will concentrate on building up a very strong Shorthorn herd at that school.

PLANS TO RAISE
\$200,000,000 BY
DOMESTIC LOAN

Ottawa, July 14.—Negotiations are already under way looking toward the flotation of the loan by which Victory Loan maturities and temporary borrowings are to be met this fall. It is the intention of Hon. W. S. Fielding, finance minister, to make the loan, if possible, a domestic one. In spite of the success of the loan recently floated in New York, and the satisfactory conditions thereof, the minister believes it is better to pay interest to Canadians than to send it out of the country.

While the patriotic stimulus which helped to make the Victory Loans a success is now lacking, it is anticipated very few of those who subscribed to the Victory Loan of 1917, which matures in December, will decline to convert bonds held, even should the non-transferable feature be eliminated, which it undoubtedly will.

The amount of the maturing loan is \$180,000,000. In addition \$100,000,000 worth of temporary borrowings must be met, but inasmuch as \$140,000,000 was raised in New York, the proposed domestic loan will, it is believed, be for \$200,000,000.

It is doubtful whether the same method as was employed in underwriting former loans, namely, through the financial houses on a commission basis, is probable that money subscription will be called for through the banks and bond establishments instead.

Dees can no longer be imported from Europe, according to the law, but issued by the minister of agriculture for Ontario. The reason for the restriction is the danger of introducing a contagious disease known as "Wight disease."

GHOST MOVES
FURNITURE
ATTACKS WOMAN

London, July 14.—A "ghost" that tramps the floors of a haunted house, parades furniture about and on at least one occasion has attacked a woman, is arousing the deepest interest in psychic and scientific circles throughout Europe.

SEVENTY-TWO PER CENT.
WHEAT BY POOL

**SEVENTY-TWO PER CENT.
WHEAT BY POOL**

Seventy-two per cent of the wheat of the 1922 crop exported by Australia or approximately 70,000,000 bushels, has been shipped through farmers' voluntary pools, stated Hon. A. S. Trethowan, a member of the legislative council of New South Wales, during a recent visit to Calgary. "The Canadian farmer has been obtaining 25 cents per bushel more for his wheat in the world's markets, be reason of the existence of the Australian pool, which stabilized prices to some extent," said Mr. Trethowan, addressing the Calgary board of trade on July 12th. "This pooling plan was not adopted until the delivery of the 1922 harvest was beginning." The first advance given was three shillings, or about 75 cents, and the final price to the producer will be from four shillings and eightpence to five shillings and twopenny. The greatest amount of overfertilizer or loan required at any time to handle the pooled grain was \$16,000,000. Mr. Trethowan has been visiting Great Britain, the United States and Canada, with a view to bringing about cooperation between the wheat growing countries in the scientific regulation of the flow of wheat to the markets of the world. The Australian pool is voluntary.

"Most emphatically form a pool, in order that we may be able to co-operate with you, whether yours be a government or a voluntary pool," said the Australian.

AN EGG MARKED
"AGW" LAID BY A
KEYSTONE HEN

W. M. Hayes of Keystone, a north west of Pigeon Lake, possesses a hen which presumably recognizes the vast possibilities of the north, in that she has laid an egg bearing the letters of the "AGW" standing out in bold relief on the shell, while around the small end of the egg was a well defined circle. About a month ago the feathered one first exhibited signs of originality, and produced an egg bearing the letter "N" and also the ring at the small end, but now she has extended her repertoire and Mr. Hayes is wondering what is coming next.

In the present instance, the letters "AGW" stand out clearly; there is no mistaking them, while it is obvious that they are part of the shell construction itself, and could not have been "tacked." This too is substantiated by the fact that the egg still contains its original contents and is unbroken.

This hen is a last year's pullet, being a mixture of Rhode Island Red and Leghorns, and in addition has the distinction of possessing eleven claws.

CHERRY GROVE.

Mr. and Mrs. John Arnold returned
home on Tuesday from visiting rela-
tives at Elmore. They were accom-
panied by Mr. and Mrs. Wm. Arnold
of South Dakota, who will make a
short visit here.

Mrs. Bailey and Miss Evelyn Bal-
ley of Saskatoon, old time friends of
Mr. and Mrs. E. S. Switzer, are
spending a few days here renewing
the acquaintance of these ladies.

The many friends of Miss Fern Lar-
sen are glad to learn that she is re-
covering nicely after a serious opera-
tion at the Wetaskiwin hospital.

A most enjoyable social time was
spent by the U.P.A. and U.P.W.A. at
the home of Mr. and Mrs. Heckmole
on Friday evening. After a friendly
game of baseball, refreshments were
served.

There was a gathering of July
friends at the home of Leonard and
Raymond Pearson on Monday after-
noon.

Mrs. Chas. Massen and children
have been visiting with her brother,
Mr. Thos. Cherrington, and other
friends in the district. They have
for their new home in Vancouver on
Wednesday of this week.

MILLET

Great preparations are now being
made for the coming Millet fair on
August 21st. This fair is going to be
just as big as any of the others we
have had despite what the knackers
are saying. We understand that Mil-
let was to have had a Knackers' Club,
but this was all settled the other night
at a meeting they held. The knackers
began knocking one another so they
are still knocking.

The campers are still pouring out
to the lake, and soon Millet will not
have any population.

Say, fellows! Do you know that
Millet has a real baseball team this
year. To date they have played 12
games and won nine of them. Last
week they played three and won all
of them; on Monday night they joy-
neyed to Wetaskiwin and beat the
Grouchems of Wetaskiwin 8 to 6; on
Wednesday they went to Hay Lakes
and beat that team 20 to 7, and on
Friday night they went to Crooked
Lake and played a fast and exciting
game with the Crooked Lake team,
winning from them by the close score
of 3 to 2. This was a real game, and
both pitchers, Doug and Lee, were in
great form, allowing very few hits.
It certainly is a pleasure to follow
up a bunch such as we have this year,
and they certainly deserve our sup-
port, so do not fail and be on hand
for the next game that will be an-
nounced soon.

Mr. and Mrs. Kent and children, ac-
companied by Mrs. Kelley and Mrs.
Moffatt, called upon Mrs. Paey and
Mr. and Mrs. A. Rosberg in Wetaski-
win on Sunday. Both these couples
evidently wish they were living back
in our own village where the people
are living on a more sociable and
friendly plane than they are in our
neighboring town to the south.

Mrs. Kelley and Mrs. Moffatt ex-
pect to leave next week to visit their
brother at Salmon Arm, B.C.

Mr. J. Dinney and Mrs. H. Moffatt
visited with Mrs. Paey at Wetaski-
win on Tuesday.

His Origin

A little Swede presented himself
to a certain schoolman for instruc-
tion.

"What's your name?" the teacher
asked.

"Yonny Olsen," he said.

"How old are you?"

"Ay and know how old Ay been."

"Well, where were you born?"

"Ay not been born at all; Ay got
stopmatter."

Rev. W. H. Irwin and family are
spending a few days at Gull Lake,
visiting Mrs. M. O. Nelson.

founding of the Synodical Conference
it has carried on extensive work
among the negroes of the black belt;
it has established church schools
where the third generation of colored
Lutherans is now being trained. It
has built colleges for the higher edu-
cation of the young negroes of the
south. At public and charitable in-
stitutions the missionaries of this
church bring light to the blind, balm
to the sick and spiritual riches to the
earthly poor. At its own numerous
hospitals, orphanages, infantries and
old folks' homes, asylums for the care
of tubercular and epileptic patients,
thousands are under the care of mis-
sionaries.

But the message which the Missouri
Synod has proclaimed has been too
powerful to be confined within the
limits of this country. It has been
preached for many years in Brazil and
Argentina, where some sixty mis-
sionaries are working at present. Mis-
sionaries of this church have gone
back to Europe, where in Germany,
England, France and Czechoslovakia
the independent mission congrega-
tions of the Free Church of Europe
have been supported for many years.

Assistance has been lent to the es-
tablishment of an active Lutheran church
body in Australia and New Zealand,
and for the last twenty-five years
this Synod has carried on missionary
work among the heathen, first in In-
dia and more recently in China. Here,
in countries teeming with uncounted
millions of superstitious heathens,
the scriptural and conservative prin-
ciples of this church have been blessed
with the same encouraging results
as in this country. During the past
year ten new missionaries and one
female teacher, as well as five doc-
tors and three nurses, entered the mis-
sion fields in East India, where their
native pastor was ordained and many
other native workers enlisted. Dur-
ing the same time the missionary
ranks in China were reinforced by
five additional missionaries, one fe-
male teacher and several native aids.

A great movement for the develop-
ment of this foreign mission work
seems to be under way in the Lutheran
congregations of this country, which
promise over greater activities for
the future.

At home and abroad the mission-
aries of this church have preached
nothing but the gospel of Christ cru-
cified. No revivals, no trait biting,
no proselyting has marked the steps
but honest efforts of these men.
From their pulpits have resounded
not the issues of the day, but the is-
sues of eternity and the hereafter.

And these missionaries have stood
up for principle and have spoken with
the courage of a conviction which
knows neither fear nor favor. Brand-
ed as antiquated, narrow and bigoted,
because of their insistent demand of
a brave and open confession of Jesus
Christ as the only but sufficient
Savior of every man, woman and child
who ever lived or ever will live upon
the face of this earth, these men, with
the help of God, are bringing an
unmistakable twentieth century demon-
stration of the all-conquering power
of Christ's gospel.

In our own midst we have three
Lutheran churches, which are ever
ready to bid a hearty welcome to all
who wish to attend. If you have no
church home, visit our church next
Sunday morning and evening. At 8
p.m. we have our regular English ser-
vice in the city of Wetaskiwin at
the Zion church. Your children will
be taught along Lutheran lines in Sun-
day school at 9:45 a.m. For informa-
tion see any of the Lutheran pastors
in the vicinity.

Remember

One-third of the entire
nerve force is used to supply
the eyes with perfect vision.

Unless this is properly
distributed, imperfect vision
and fatigue is the result.

An examination will very
quickly reveal any defect.

Co-operative Marketing

WHERE THERE'S A WILL, THERE'S A WAY.

Organization is the cornerstone of Cooperative
Marketing of Farm Produce.

The Producer demands the widest market pos-
sible. This can be done only by marketing the
hogs through one channel—

By this system—

EVERYONE GETS THE HIGHEST PRICE

EVERYONE GETS THE SAME PRICE

This system will be established when the public
demand is strong enough. Give it a boost.
